

Oshkosh Defense Features the Joint Light Tactical Vehicle at Eurosatory 2016

Jun 13, 2016 2:00 AM

The next generation of light vehicles will replace HMMWVs with greater protection, speed and off-road mobility in a very transportable package

OSHKOSH, Wis.--(BUSINESS WIRE)-- [Oshkosh Defense](#), LLC, an Oshkosh Corporation (NYSE: OSK) company, will showcase its Joint Light Tactical Vehicle (JLTV) at Eurosatory on June 13-17 in Paris, France. The Oshkosh JLTV is the next-generation light tactical wheeled vehicle that delivers unmatched protection, speed and off-road mobility over the most demanding terrain to safely transport soldiers during their missions.

The Oshkosh JLTV provides soldiers with the transportability, performance and protection they need for current and future battlefields. (Photo: Business Wire)

Based on the Oshkosh Light Combat Tactical All-Terrain Vehicle (L-ATV) platform, the

Oshkosh JLTV is the U.S. Department of Defense's choice to replace the U.S. fleet of uparmored HMMWVs for the Army and Marine Corps.

“There is simply no comparison between the HMMWV and JLTV—our JLTV sets a new standard for light vehicle protection and off-road mobility,” said John Bryant, Oshkosh Corporation senior vice president and president of Oshkosh Defense. “The JLTVs that we are building today are the result of years of development and rigorous U.S. Government testing, which has resulted in the highest performance ever achieved in a light tactical wheeled vehicle.”

The combination of the JLTV's powerful drive train and TAK-4i™ suspension enables soldiers to travel off-road at speeds that are 70% faster than today's gold standard. Additionally, the TAK-4i can be raised and lowered using interior operator controls to maximize sea, air and land transportability. The JLTV can be air transported internally by a C-130, C-5, C-17 or externally by CH-47 and CH-53, and other aircraft with similar characteristics used by international militaries.

The Oshkosh JLTV has the latest technologies, as well as unprecedented protection. With the Oshkosh Core1080™ crew protection system, every inch of the vehicle is designed to save lives during blasts, IED events, and other threatening situations. Core1080 is an occupant-centric, comprehensive systems engineering approach that considers every component and technology to protect the crew, optimize readiness and effectively complete every mission.

For nearly 100 years, Oshkosh has been a pioneer in designing, integrating, manufacturing and sustaining military vehicles including a full portfolio of heavy, medium, MRAP, aircraft rescue and fire fighting (ARFF), and light vehicles. Oshkosh serves armed forces around the globe and has produced and sustained more than 150,000 tactical wheeled vehicles for the United States and its allies including the Kingdom of Saudi Arabia, the United Arab Emirates, the United Kingdom, Jordan, Oman, Greece, Turkey and Egypt.

Oshkosh Defense leadership will be available to discuss the Oshkosh JLTV, and the company's portfolio of vehicles, technologies and integration capabilities at Eurosatory booth #D608.

About Oshkosh Defense
