

# Oshkosh Corporation Creates New Product Category with North America's First Fully Integrated, Zero-emission Electric Refuse Collection Vehicle

Feb 21, 2023 7:00 AM

*Innovation and environmental stewardship spur cutting-edge, purpose-built solution*

OSHKOSH, Wis.--(BUSINESS WIRE)-- Oshkosh Corporation (NYSE: OSK), a leading innovator of purpose-built vehicles and equipment, is pleased to announce that it has engineered and produced North America's first fully integrated, electric refuse collection vehicle, creating a new category and bringing advanced technology to the refuse industry.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20230220005253/en/>

Traditional refuse vehicles require the mounting of a refuse collection body to a third-party chassis.

The new Oshkosh integrated refuse collector has been designed from the ground up to offer customers a single original equipment manufacturer (OEM) electric vehicle (EV) solution.

“Entry into new product categories is a crucial element of our 'Innovate. Serve. Advance.' growth strategy,” said John Pfeifer, president and chief executive officer of Oshkosh Corporation. “With a deep heritage in the design and manufacture of purpose-built, heavy-duty trucks coupled with field-proven refuse body technology, Oshkosh is uniquely positioned to develop this integrated vehicle. Our vast innovation capabilities are evident in every aspect of this first-of-its-kind product.”

Oshkosh leaned into its nearly 30 years of electrification expertise to bring its latest vehicle to market. This electrified refuse collector features a sophisticated drivetrain that includes advanced lithium-ion batteries and a revolutionary electric-axle system. The vehicle will enable a full day's refuse collection on a single charge with zero emissions. It was designed to minimize environmental impact and reduce noise in communities around the world, while helping customers meet their sustainability initiatives.

“When Oshkosh engineers began this project, they put both the customer and user experiences at the center of our design,” said Pfeifer. “For the buyer, chassis selection and integration are eliminated. For the driver, active safety systems, performance technologies and ergonomic features deliver best-in-class safety, comfort and productivity. And for the technician, intelligent, connected systems reduce routine service and enable condition-based maintenance.”

Manufacturing of Oshkosh's integrated, electric refuse collection vehicle will leverage several Oshkosh facilities, including a new, state-of-the-art plant in Murfreesboro, Tennessee. Product

prototype testing on designated routes will be completed in 2023, with customer deliveries starting in 2024.

### **About McNeilus**

McNeilus Truck and Manufacturing, Inc. is an industry leader in refuse truck bodies, OEM parts and customer support and service. Our lineup of front loaders, rear loaders and automated side loaders help you handle every route more efficiently. We offer a network of service centers and mobile service techs across the country, same-day parts availability, and a variety of alternative fuel systems and services for any refuse vehicle. Whatever your challenge, we've been down that route before. Visit: [mcneiluscompanies.com](https://mcneiluscompanies.com).

### **Forward Looking Statements**

This news release contains statements that the Company believes to be "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including, without limitation, statements regarding the Company's future financial position, business strategy, targets, projected sales, costs, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of management for future operations, are forward-looking statements. When used in this news release, words such as "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "should," "project" or "plan" or the negative thereof or variations thereon or similar terminology are generally intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, assumptions, and other factors, some of which are beyond the Company's control, which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These factors include risks related to the Company's ability to successfully execute on its strategic road map and meet its long-term financial goals. Additional information concerning these and other factors is contained in the Company's filings with the Securities and Exchange Commission. All forward-looking statements speak only as of the date of this news release. The Company assumes no obligation, and disclaims any obligation, to update information contained in this news release. Investors should be aware that the Company may not update such information until the Company's next quarterly earnings conference call, if at all.
